helping you ride the waves of technology

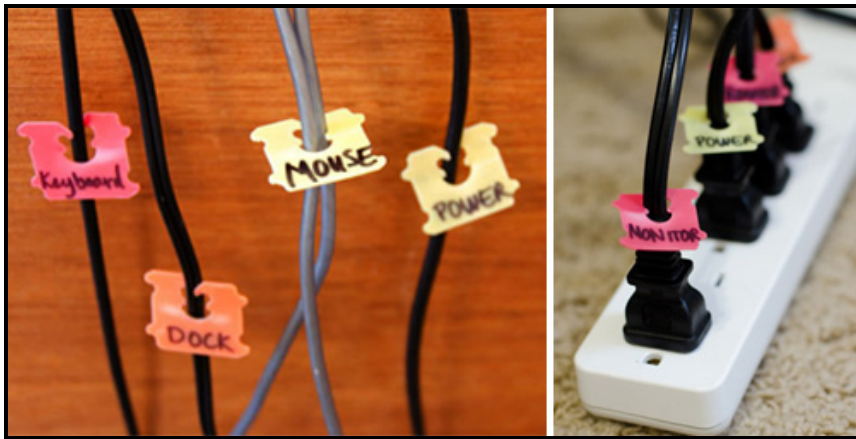

## What's In Your Computer's Future

Just to show that technology marches on with or without us, both Microsoft and Apple have recently announced information regarding their operating system upgrades coming in the not-so-distant future.

Note: If you don't care to read all the technical mumbo jumbo that makes us geeks and gear heads get excited, here's the bottom line. The writing is on the wall for both Mac OS X 10.6 Snow Leopard and Windows XP (and possibly Vista) and they will be going the way of the dodo. While this doesn't mean you have to replace or upgrade your computer or operating system, you need to be aware you may not be able to take advantage of certain software or features in the future. And, securing your PC, as well as maintaining or repairing it, can take more time and be more costly.

Click [here](#) to finish reading this article and find out what's in store for you operating system.

## Clever Ideas...

Consider using bread bag clips to control cable clutter.
